game Saturday and the Senators, handicaped by the absence of several of its best players and Duryea's wild pitching, lost the game by the score of 8 to 5. The home club started off by making two runs in the first inning, but a disastrous error by Hoy in left allowed the visitors to score two runs and tie the score. In the third the Baltimores secured three runs, which can be charged almost wholly to Durvea's which can be charged almost wholly to buryes of wildness, as he sent man after man to base on bails and forced runs over the home plate. In this inning the work of Radford shone out with particular beightness, he capturing a wild thrown ball by McGuire and holding the runner on third base. The feat was remarkable, as the runner was half way to third when the play was made and every one expected to see a play was made and every one expected to see a run scored. The Baltimore players on the bench were dumfounded and words of praise came from all of them. In the eighth inning the Baltimores again scored, three runs cross-ing the plate. They then stopped, the score standing eight. The Senators scored one run in the seventh and two in the ninth, making a total of five. Vickery pitched a strong game and his club hit the ball when it came over the plate. This in a nutshell accounts for the vic-tory. Great objection was found to Maculler's umpiring, but Mac is not a home umpire and consequently has a hard row to hoe. He receives the same treatment in Baltimore when he officiates there, and very few kicks come from the visiting club when he is doing the honors. The Senators were outplayed, pure and simple, and the umpire affected the sc

I have a suggestion to make which I presume will be treated with su-preme contempt by the officials of the com-pany. When the train starts again it will be under control of the engineer, and the thousands of persons who are compelled to use H street will feel reasonably sure that they will not be the victim of a "Royal Blue" or a "forfy-five-minute train."

Mr. Editor, I desire to ask one question. Is it within the power of the Commissioners of the District of Columbia to enforce the suggestion above recommended? To be sure, depressed or elevated tracks, or bridging important streets, is the only absolutely safe remedy, but I fear it will be a long time before such a blessed condition of railroad affairs will exist in East Washington.
